CEMENT PROTECTION INFORMATION

The City of Coachella necessitates extra fortification for all cementitious construction due to the harmful and intrusive soils conditions. To ensure this, a minimum of 10 mil visqueen mandatory under all cementitious materials. A plastic membrane must also be installed between pools and soils, as well as between flatwork and cement. Additionally, the first (2) courses of block walls require protection as per the city's regulations. Please refer to Title 15 of the City Municipal Code for further information.
